- Figma
- Microsoft Office

EDUCATION

Turing School of Software & Design, Front End Engineering
Jan 2019 - Aug 2019

Colorado State University,
M.A. Philosophy
Sept 2013 - May 2015

University of Colorado Denver,
B.A. Philosophy
June 2007 - May 2011

SUMMARY

I am a Front End Engineer with a passion for putting together thoughtful and intuitive UIs, utilizing the latest and greatest technologies, and collaborating with colleagues and clients to enhance our products and user experiences.

WORK EXPERIENCE

Software Engineer - Frontend, Loyal Health

January 2022 - Present

- Utilize TypeScript, React, & Cypress to build out new features, troubleshoot bugs, and re-factor codebase
- Communicate & collaborate with multi-disciplinary teams of engineers, designers, and product managers on a daily basis
- Deploy modern, performant, and maintainable code to Production on a bi-weekly basis
- Help drive technical and design direction for applications used by dozens of health systems
- Provide mentorship to summer interns through weekly meetings and pair programming sessions to better understand software engineering practices and principles
- Help implement Micro-Frontend Architecture to create a new unified Platform application
- Lead conversion of application codebase from JavaScript to TypeScript

Delivery Software Engineer, IQGeo

January 2020 - January 2022

- Utilize JavaScript, HTML/CSS, & React to build out new features and troubleshoot bugs
- Use Python & PostgreSQL to bring in new data and enhance Back End functionality
- Implement various geospatial libraries like OpenLayers, Leaflet, & Turf.js
- Use Linux to develop, test, and deploy software to various environments (QA, STG, & PROD)
- Use Adobe and Figma to create various design documents in collaboration with clients
- Implement new installs of IQGeo products for clients
- Collaborate remotely with colleagues across US and international time zones
